

how to verify your PayPal account without a bank account

01/10/2015

Hernández serrano, Joshua moisés
Universidad de Carabobo, Venezuela

ABSTRACT

PayPal is a company that really makes our payments much easier to perform due to its simplicity; in fact you can instantly send and receive money by just using an e-mail direction.

Using PayPal is much easier and comfortable than using your bank accounts even more if you are earning money via internet in fact even to create a PayPal account is as easy as creating a twitter/Facebook account. All you have to do is to give your personal data such as your name, your address, your cell phone number and your email.

Once you successfully created your account you can use it without having any trouble for sending and receiving money but you will have some limitations while you don't proceed to verify your account.

“Everybody can create a PayPal account. However sooner or later you must have to verify it” –

Sadly this is true, if you don't verify your account you will have limits for sending and receiving money and if you deposit some money in there most likely you will not be able for using it properly.

How to verify your PayPal account?

PayPal has a very particular method to check whether you are a natural person and that you have a real bank account or not. For doing this PayPal debits 1,95 USD from your credit card or your bank account respectively also to check that you have funds into your accounts.

Once done PayPal is going give your 1,95 USD back to your PayPal account, so you will not lose the money on the transaction.

Can you verify your account without having a credit card or a bank account?

Yes you can do it by using virtual Credit Cards / bank accounts such as Neteller, Payoneer, Walmart and others.

For verifying a PayPal account, PayPal works with VISA and MasterCard Credit Cards this is exactly what you get with a Virtual Credit Card.

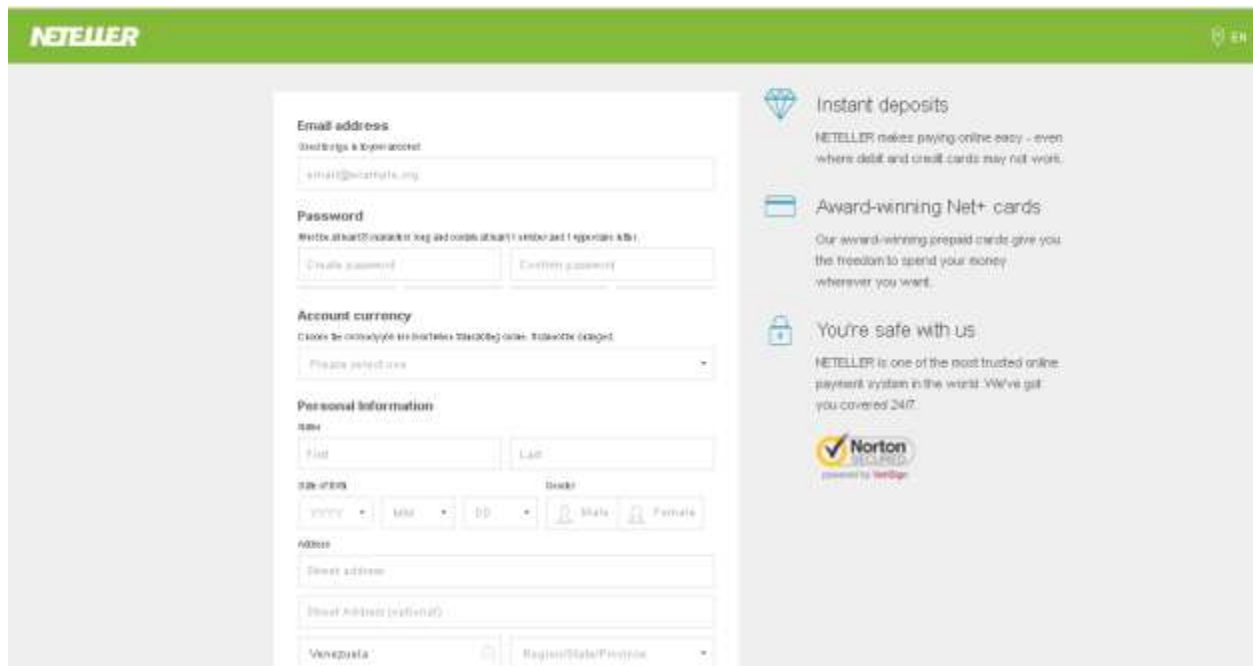

how to Verify your PayPal account with without having a credit card or a bank account?

in the following lines I will be explaining how to do it in the easiest way(Neteller).

- 1) by using a Neteller Account (you don't need to verify your Neteller account to use it for verifying PayPal)
- step 1 :** go to this link [Neteller](#) and create your account

step 2 : fill you data (please do it right , it is a simple form but they will check your info and if the info you gave is false the will cancel your account)

The image shows the Neteller account creation form. The form is divided into several sections: 'Email address' with a text input field and a 'Verify email' button; 'Password' with two text input fields and 'Create password' and 'Confirm password' buttons; 'Account currency' with a dropdown menu; 'Personal information' with fields for 'First' and 'Last' name, 'Date of birth' (YYMMDD), 'Gender' (Male/Female), and 'Address' (Street address, Street Address (optional), and 'Vat/pref.' with a 'Region/State/Province' dropdown). To the right of the form are three promotional boxes: 'Instant deposits', 'Award-winning Net+ cards', and 'You're safe with us'. The bottom right corner features the Norton logo.

Once you created your account you will need to charge at least 3 dollars in there (I really do recommend you to use five USD)

Deposit to your account

Add some money to get started

Before you can use your NETELLER account, you need to make sure there's money in it. And with instant and non-instant options for our members in every region, getting money into your account couldn't be easier.

To get started, select the option below that best suits you.

<p>Deposit now 4.95% fee</p>	<p>Deposit now 4.95% fee</p>	<p>Deposit now 4.95% fee</p>	<p>Deposit now 4.95% fee</p>	<p>Deposit now 4.95% fee</p>	<p>Deposit now 4.95% fee</p>
<p>Deposit now 1.0% fee</p>	<p>Deposit now FREE</p>				

note if you don't have a way for charging money into your Nettleter account , at the end of this item I will show you how to

step 3 : now that you added the 3 USD to your Neteller account you can ask for a virtual credit card (the first one is totally free)

The screenshot shows the Neteller website interface. At the top, the account balance is displayed as "Saldo disponible 5,00 USD". A red arrow points to this balance. On the left sidebar, the "Tarjetas Net+" option is highlighted with a red arrow and the number "1". The main content area features a section for "Net+ Virtual Gift Card" and a larger section for "Net+ Prepaid MasterCard". The "Net+ Prepaid MasterCard" section includes a list of benefits and a button to "Obtener una tarjeta virtual". A red box highlights this section, and a red arrow with the number "2" points to the "Obtener una tarjeta virtual" button.

PP1883CODE

it will take some time but if you don't have a way to get money into your Neteller account , then you can earn some in neobux (www.neobux.com) ... you can earn the needed 2 dollars by watching websites , you will get paid directly into your Neteller account.

also you can find exchangers : for example you send 5 dollars from your PP account and they deposit 3 dollars into your Neteller one (they get a commission for the service)

Walmart and Greendot are virtual credit cards they should work in the same way than Neteller, so they work for sure.

2) Payoneer: this one is the best one but will take much longer

Payoneer is not a virtual credit card , it creates you an account into a bank within the United States of America that's why it takes longer but it is just for your security also they will send you a plastic credit card to you home once you create your account .

step one 1 : create an account on Payoneer : as this is a bank account you can't send false information , if you do so your account will be rejected .

(if you create your account by following this link :

<http://share.payoneer-affiliates.com/v2/share/6200718156896014206>

you will get 25 USD as a gift (you can see all the info from the page if you don't believe me))

Step 2 : once you have created your account , you must verify / validate your account for using it to verify your PayPal account . This verification process is simpler, you just have to answer some questions about you and then to send a scanned copy of your Identification document or passport

step 3 : see your bank data

Congratulations you added your bank account (from an American bank)

- 3) searching on the web you can find some people , companies which will activate your PayPal account for a prize , for example here in Venezuela there is a website which offers you to verify your PayPal account and you have to pay the service in BSF (our currency)

Extras :

****your Neteller and Payoneer accounts both as bank accounts and credit cards can be used for shopping via amazon , withdrawing money from a ATM etc.***

****you can send money from your fiverr account to your Payoneer account***

Summary

PayPal is a nice company but it's annoying with things related to bank accounts. so there are many ways to verify your PayPal account created by people who have been annoyed by them (as me) you just have to try the one that fits the better to your needing and options in order to verify your account, if you didn't have a credit card / bank account for doing the verification , now I have shown how to get one for doing it . now it is all up to you verify your account and start getting the full PayPal experience.
